1. PRODUCT AND COMPANY IDENTIFICATION

Product Name	Rosemary Essential Oil - ct Cineole (Tunisia)
Botanical Name	Rosmarinus officinalis L.
INCI Name	Rosmarinus Officinalis Leaf Oil
CAS #	84604-14-8
Country of Origin	Tunisia
EINECS #	283-291-9
Product Use	Domestic and Industrial
Supplier / Distributor	Cosmetic Labs Canada
Address	298 Wellington St W, Sault Ste. Marie, Ontario P6A 1H7
Website	www.cosmeticlabscanada.com
Emergency	CANUTEC (613) 996-6666 (24 hours)
After-hours support	705-910-6300

2. HAZARDS IDENTIFICATION

Emergency Overview

GHS Classification

Flammable Liquid - Category 3

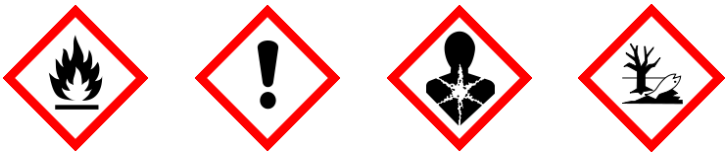

Aspiration Toxicity - Category 1

Skin sensitization - Category 1

Hazardous to the aquatic environment - Chronic - Category 1

Germ cell mutagenicity - Category 2

GHS Label elements, including precautionary statements

Signal: Danger

Hazard statement(s)

H226	Flammable liquid and vapor.
H317	May cause an allergic skin reaction
H304	May be fatal if swallowed and enters airways
H341	Suspected of causing genetic defects
H410	Very toxic to aquatic life with long-lasting effects

Precautionary statement(s)

P201	Obtain special instructions before use.
P202	Do not handle until all safety precautions have been read and understood.
P210	Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.
P233	Keep container tightly closed.
P240	Ground/bond container and receiving equipment.
P241	Use explosion-proof electrical/ventilating/lighting/equipment.
P242	Use only non-sparking tools.
P243	Take precautionary measures against static discharge.
P273	Avoid release to the environment.

P280	Wear protective gloves/protective clothing/eye protection/face protection.
P281	Use personal protective equipment as required.
P301+P310	IF SWALLOWED: Immediately call a POISON CENTER/doctor/
P303+P361+P353	IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
P308+P313	If exposed: Call a POISON CENTER or doctor/physician.
P331	Do NOT induce vomiting.
P370+P378	In case of fire: Use … to extinguish.
P391	Collect spillage.
P403+P235	Store in a well ventilated place. Keep cool.
P405	Store locked up.
P501	Dispose of contents/container to …

Other Info

Allergens (Selon Directive Cosmétique 2003/15/CE): D-limonène (≤ 4.0 %), Linalol (≤ 1.50 %)

3. COMPOSITION / INFORMATION INGREDIENTS

Product Name	Rosmarinus Officinalis Leaf Oil
CAS NO	84604-14-8
EC NO	283-291-9
Concentration	100 %

4. FIRST AID MEASURES

Eye contact

Rinse immediately with plenty of vegetable oil by opening large eyes. - If possible, lift the upper lid and rinse. If irritation persists or you notice any injury, consult your ophthalmologist with the product. - For contact lens wearers: Flush eyes immediately. The lenses are sure to fall while rinsing. If it does not, remove them after rinsing. Do not reuse. - For soft lenses: Laying the lens regardless of the renewal. - For hard lenses, they can be reused after a professional cleaning by your ophthalmologist

Skin contact

Remove contaminated clothing. Wash area with soap and water. If irritation occurs, get medical attention.

Inhalation

Move exposed person to fresh air. Keep theperson warm and at rest. Call a doctor in case of persistence or worsening of adverse health effects. If unconscious, place the person in recovery position and call a physician immediately. Ensure good air circulation.

Ingestion

Rinse mouth with water. Move exposed person to fresh air. Keep the person warm and at rest. Do not induce vomiting unless directed by medical personnel. If vomiting occurs, keep head down to prevent the passage of vomit into the lungs. Call a doctor in case of persistence or worsening of adverse health effects. If unconscious, place the person in recovery position and call a physician immediately. Ensure good air circulation

5. FIRE FIGHTING MEASURES

Suitable extinguishing media

Carbon dioxide extinguishers or dry (Class ABC) fire extinguisher foam.

Unsuitable extinguishing media

Water jet.

Special protective equipment and precautions for fire-fighters

Avoid breathing vapors and fumes. Use a mask if necessary. Do not attack the fire with water: the water instead of stifling tends to fuel the fire. Essential oils have the ability to float on water. The fire spread is then accelerated. To extinguish an incipient fire based essential oil, use dry powder-specific ABC (or equivalent). If the fire is not important, it can be smothered by covering with earth, sand or blanket.

Special hazards arising from the substance or its combustible products
Possible production of toxic fumes in case of fire.

Resulting gases
Carbon oxides.

6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures.
Avoid all flammable sources. Ventilate premises. Do not smoke

Environmental precautions
Avoid contamination of drains, surface water and groundwater. Dispose of rags, sponges, etc. used to mop up by current regulations.

Methods and materials for containment and cleaning up
Large spills should be cleaned with inert absorbent material that will be scanned and then destroyed in accordance with existing regulations.

7. HANDLING AND STORAGE

Precautions for safe handling
To avoid splashing into the eyes and mucous membranes and following the arrangement of the workplace and manipulations, wearing glasses and special clothing (gloves...) may be indicated. It is prohibit smoking in areas where they are handled. Do not heat the perfumery products with a naked flame or expose their vapors to a flame or other sources of ignition (eg electrical equipment). Do not abundantly breathe vapors. Get quickly rid of sponges, etc. .., used to absorb perfumery products: this will be done by incineration because we know cases of auto-oxidation with spontaneous combustion of some of these products. Large spillages should be contained with sand or inert powder. For incorporation into the final product, the products must be kept at relatively low temperatures.

Conditions for safe storage, including any incompatibilities
It is recommended to store in containers original, closed, or in glass containers, protected from heat, air and light and avoiding too large temperature differences. Do not reuse empty containers. Perfumery products should under no circumstances be ingested. Keep away from food or drink. An adequate ventilation is desirable.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Eyes
Use tightly sealed goggles.

Skin
If skin contact or contamination of clothing is likely, protective clothing should be worn. Use protective gloves.

Respiratory
In case of insufficient ventilation, wear suitable respiratory equipment.

9. PHYSICAL AND CHEMICAL PROPERTIES

Appearance : Very clear yellow liquid.

Odor : Characteristic.

Flash point : +43°C

Relative density : 0.9070 - 0.920 @ 20°C

Solubility (ies) : Insoluble in water.

Refractive index : 1.4620 - 1.4700 @ 20°C

10. STABILITY AND REACTIVITY

Reactivity
This product is stable to shock, vibration and pressure under normal conditions of use. In the presence of light and heat, oxidation can occur.

Chemical stability
Chemically stable.

Possibility of hazardous reactions
Avoid contact or contamination with strong acids, bases or oxidizing agents.

Conditions to avoid
Do not heat to high temperature. Do not expose sealed containers in the sun. Keep away from sources of ignition.

Incompatible materials
P.V.C.

11. TOXICOLOGICAL INFORMATION

Acute toxicity
DL 50 Oral - Rat - > 5,000 mg/kg DL 50 Dermal - Rat - > 5,000 mg/kg

Serious eye damage
No significant effects or critical hazards.

12. ECOLOGICAL INFORMATION

Ecotoxicity
Daphnia acute aquatic toxicity 25.20 mg/l/48h

Persistence and degradability
Not available.

Bio - accumulative potential
Not available.

Mobility in soil
Not available.

Other adverse effects
Not available.

13. DISPOSAL CONSIDERATION

Dispose of product in accordance with local, state or provincial and federal regulations. Check with local municipal authority to ensure compliance.
